I AM 
You can find me outside! I’m usually the tall, green and leafy one.

WHAT COMES BEFORE ME
If you’re looking for nutrition, you’ve come to the right place. You need me to live and grow!

WHAT COMES AFTER ME
I love lights and have a bad habit of flying into them when I come out at night!

I AM 
I remove about 13 pounds of carbon from the atmosphere every year. Yummy!

WHAT COMES BEFORE ME
An organism needs me to live and grow. I help to build and repair tissues, give heat and energy, and regulate body processes.

WHAT COMES AFTER ME
I have what’s known as a frenulum, which joins my wings together. But if you think I’m a butterfly, guess again!

I AM 
I look like a butterfly but I’m mostly active at night.

WHAT COMES BEFORE ME
I’m covered in bark and birds love to nest in my branches.

WHAT COMES AFTER ME
I’ve got eight legs, lots of eyes and some serious web spinning skills.

I AM 
I go through many stages before I finally get my wings, but if you guessed butterfly, guess again!

WHAT COMES BEFORE ME
You may know me as coniferous or deciduous.

WHAT COMES AFTER ME
I’ve got eight legs and two body parts. The spinnerets on my abdomen produce silk.
I've got eight legs, lots of eyes and some serious web spinning skills.

I get mistaken for a lizard all the time. But I’m not covered in scales like a reptile. I’m actually an amphibian!

I might look like a lizard, but I’m actually an amphibian!

I like to trap my flies before I eat them!

I’ve got a short body, long tail, moist skin, four legs and no ears. I “hear” by sensing vibrations from the ground.

I've got a short body, long tail, moist skin, four legs and no ears. I “hear” by sensing vibrations from the ground.

If caught by a predator, I can lose my tiny tail in a pinch.

If you’re afraid of me, then you’ve got a case of arachnophobia!

Like all reptiles, I never stop growing, even when I reach adulthood. Instead, I shed my scaly skin and keep going!
I might not have any legs, but this reptile doesn’t have any problem getting around.

WHAT COMES BEFORE ME
I get mistaken for a lizard all the time. But I’m not covered in scales like a reptile. I’m actually an amphibian.

WHAT COMES AFTER ME
I’m a small mammal with a long, skinny body, fur and short legs. Hint: I look like a chipmunk, but with a longer body!

I’m a legless reptile.

WHAT COMES BEFORE ME
I avoid the sun because it can dry out my moist skin. I prefer to hang out on the leafy, damp forest floor. In winter I hibernate like most amphibians in temperate climates.

WHAT COMES AFTER ME
I might have short legs and a tiny face, but I’m a surprisingly good hunter and can take down prey bigger than me.

I’m a small mammal with a long, slender body and short legs. I might look cute but make no mistake, I’m a powerful hunter.

WHAT COMES BEFORE ME
I “smell” with my forked tongue and sometimes make a hissing sound.

WHAT COMES AFTER ME
I’m a scavenging bird and my stomach helps me digest pretty much anything!

I may be a small mammal, but I’m a great hunter. I can sneak up on prey quickly and take them down easily with my sharp teeth and claws. I’m part of the Mustelidae family.

WHAT COMES BEFORE ME
The thick, large scales on my belly are called “scutes” and help me slide across the ground without limbs.

WHAT COMES AFTER ME
My featherless head helps keep me clean when I’m feeding on dead animals.
I AM **JR.**

I’m a scavenging bird with a taste for dead animals.

**WHAT COMES BEFORE ME**

I’m a small mammal with a long, skinny body and short legs. I might look cute but make no mistake, I’m a powerful hunter.

**WHAT COMES AFTER ME**

The two of us work together to break down dead, organic material.

---

I AM **INT.**

I’m nature’s greatest janitor. I swoop in to clean up dead animals before making a quick exit.

**WHAT COMES BEFORE ME**

I may be small, but I’m a great hunter. I can sneak up on prey quickly and take them down easily with my sharp teeth and claws. I’m part of the Mustelidae family.

**WHAT COMES AFTER ME**

I play an important role in nature by breaking down dead, organic material. Examples of me include mushrooms and yeast.

---

I AM **JR.**

I used to be included in the “plant” kingdom until scientists figured out I belonged in my very own group. Mushrooms are one example of ______.

**WHAT COMES BEFORE ME**

I have incredible eyesight and sense of smell that helps me locate an animal carcass from miles away when I’m flying overhead.

**WHAT COMES AFTER ME**

If you’re looking for nutrition, you’ve come to the right place. You need me to live and grow!

---

I AM **INT.**

I used to be included in the “plant” kingdom until scientists figured out I belonged in my very own group.

**WHAT COMES BEFORE ME**

I’m the ultimate meat eater. In fact, it’s the ONLY thing I eat, and it’s usually rotting.

**WHAT COMES AFTER ME**

Calcium, potassium and protein are all examples of ______. We help things live and grow.
I AM

If you’re looking for nutrition, you’ve come to the right place. You need me to live and grow!

WHAT COMES BEFORE ME
The two of us break down organic things to help plants grow.

WHAT COMES AFTER ME
I have a trunk, branches and if you’re looking for some shade you’ve come to the right place.

Calcium, potassium and proteins are all examples of _____, which help things live and grow.

WHAT COMES BEFORE ME
I used to be included in the “plant” kingdom until scientists figured out I belonged in my very own group. Mushrooms are one example of _____.

WHAT COMES AFTER ME
For my next trick, I’ll take your carbon dioxide and turn it into oxygen.
